

JQB series Shear Pump

Technique parameters:

Model	JQB 6545	JQB 6535
Flow rate	120 m ³ /h	100 m ³ /h
Head	45m	35m
Power	55KW	45KW
Dimension	1150×1100×1500mm	1150×1100×1250mm
Weight	980kg	800kg

JQB series Shear Pump is a special purpose equipment of solids control system which can meet all customers' requirements of preparing drilling fluid for the well drilling. This shear pump manufactured by OGEM company is used to treat the high property mud, make the mud to obtain good rheological properties and cut the drilling cost as much as possible. During operation, JQB shearing pump can enhance the drilling mud hydration level. Make polymer dilute soon and save much drilling mud material. Finally cut down the well drilling cost. This ideal solids control equipment designed by OGEM's engineers has high performance and gained customer's high evaluation. Come to OGEM equipment find more info on JQB shearing pump.
